

## Croatian delegation from

### **Srednja škola Glina (High School Glina)**

Our school is a little school in a little town Glina which is located in central Croatia. We have 149 students at the moment and they are learning in specific conditions: after 2020 earthquake, our school building was destroyed but not completely. We are currently situated in a tin school building next to our building and we will stay here until our old school building is finished. The renovation began 3 years ago and is still in progress.

A lot of our students travel from other towns or villages by public transport. Despite all that, they like to learn and they like to participate in every activity in school. We have a volunteer club at school called Manus Aperta. We provide the members of the club the possibility to spend some quality time with the elderly or to take part in different types of humanitarian actions. Alongside this, our school also educates students about their own rights, equality and provides intercultural learning through Erasmus projects. The prevention of violence and illnesses is carried out through workshops and one year programs in association with our local community.

Of course, the school offers a lot more to the students...
